If there is a part that is not within the standard portfolio or may be on a long lead-time then Gateway may have the solution. Whilst the linecard details our preferred brands, the company also has associations with over 400 other component manufacturers and this, coupled with the support from our technical teams and access to our unique on-line store [www.thecomponentgateway.com](http://www.thecomponentgateway.com), enables us to maximise fit rates across bills of materials as well as resolve shortages due to lead-time or demand vagaries.

## Remember - where others can't, Gateway Can
